

ATLIQ LEAD ASSISTANT

STAKEHOLDER REVIEW · FOUNDERS & CEO

LEAD CAPTURE & FOLLOW-UP ASSISTANT

From conversation to CRM record in under a minute, and no client commitment forgotten.

01 · THE PROBLEM

THE LEADS ARE THERE. THE COMMITMENTS ARE NOT IN THE CRM.

NO NEXT DATE

Open deals sit without a follow-up date

DEALS GO QUIET

Weeks pass with no contact

PROPOSALS WAIT

Sent, then never chased for a reply

NO OWNER

Some deals have nobody following up

Leads arrive by referral, LinkedIn, events and existing clients. The founders sell between operations and travel, so the CRM is updated days later, if at all, and follow-ups run on memory.

02 · ROOT CAUSE

FIVE WHYS LEAD TO ONE GAP

WHY 1 Revenue is lost because follow-ups are late and revisits never happen.

WHY 2 Commitments like "check back in Q4" are never written into the CRM.

WHY 3 Leads and conversations are logged late, with little detail, or not at all.

WHY 4 Founders sell alongside operations; CRM entry is a separate manual task.

ROOT CAUSE The CRM is not connected to email, calendar, LinkedIn and meetings.

03 · WHAT WE BUILT

A WORKING PROTOTYPE THAT COVERS THE WHOLE SALES LOOP

CAPTURE

Emails, meeting notes and LinkedIn chats become draft CRM records. Internal reviews split into one draft per deal.

REVIEW

The deal owner confirms, edits or discards each draft. Every field shows the sentence it came from.

FOLLOW UP

Revisit dates and silent proposals become reminders with a live timer, plus a drafted reply to send.

PIPELINE

Dashboard, stage board and action queue show value at risk. Ask questions in plain English.

Works end to end · 24 automated tests passing · live mailbox connection is next

04 · HOW IT WORKS

FROM CONVERSATION TO FOLLOW-UP, WITH THE OWNER IN CONTROL

Nothing is saved to the CRM, and no client is contacted, without the deal owner.

WHAT A FOUNDER SEES EACH MORNING

FOLLOW-UPS

Client A Proposal waiting for a reply	Overdue 3d
Client B Promised a scope note	Due in 6h
Client C Asked to revisit next quarter	Due in 12d

One card per deal, most urgent first, with a one-click drafted reply.

PIPELINE HEALTH

NEW	CONTACTED	PROPOSAL
Client D Assign owner	Client F Quiet 3 weeks	Client A No reply yet
Client E Next step set	Client G Next step set	Client H Next step set

Deals needing attention come first; assign owners and next steps from the board.

06 · WHERE AI IS USED

SEVEN AI JOBS, EACH WITH A HUMAN CHECK

AI job	What it does	Human control
Classify	New lead, existing deal, existing client, internal note or not sales	Personal items skipped
Draft the record	CRM fields and a short summary, every value quoted from the source	Owner confirms before saving
Find dates	Revisit dates and deferrals, e.g. "check back next quarter"	Becomes a reminder only
Split notes	A pipeline review becomes one update draft per deal	Each draft confirmed
Cross-sell	Ideas from that client's own history and our service list	Owner decides
Draft reply	Follow-up email from the deal's records; unquoted facts flagged	Owner edits and sends
Ask the pipeline	Plain-English answers with linked deals and quotes	Read-only

If the AI is unavailable, a rules-only mode keeps capture running and marks every draft for review

07 · WHAT IT CATCHES

COMMITMENTS A CRM NEVER HOLDS TODAY

A LOST DEAL

"Not now. Check back with us next quarter."

Becomes a revisit reminder, instead of a closed file.

AN OPEN DEAL

"The decision moved to our next board meeting."

Becomes a dated reminder for the decision.

AN INTERNAL REVIEW

One meeting note covers several client deals.

Becomes one update per deal, each matched to its CRM record.

Every value carries its source quote

24 automated tests pass

Paid AI tier needed at full volume

SIX GUARDRAILS PROTECT THE CRM AND OUR CLIENTS

Owner confirms every record before it is saved

Never contacts clients: it drafts, the owner sends

Every fact quoted; missing values left empty, never guessed

Sensitive data masked; personal and excluded items never stored

No cross-client leaks: ideas use that client's own history only

Full action log and a one-click pause switch

KILL SWITCH: BACK TO THE MANUAL PROCESS IF

a record is saved or a client contacted without confirmation · personal data is stored · one client's data appears in another's · confirmation rate stays below 50% for two weeks

THE AI COSTS LESS THAN A COFFEE A WEEK

\$4.35

per month on the selected model, at **100 conversations a day** plus 20 email drafts and 15 questions

About 4,500 input and 1,500 output tokens per conversation, across three AI calls.

Model compared	Per month
gpt-oss-120b (selected)	\$4.35
gpt-oss-20b	\$2.17
qwen3.8-27b (preview)	\$26.50
Claude Haiku 4.5	\$33.12

Hosting excluded. Even the most expensive option is under \$35 a month, small next to one recovered deal.

ONE NORTH STAR, GATED BY AI ACCURACY

95% of new leads recorded within 24 hours with source, requirement and next step, gated by field extraction accuracy of at least 90%

Layer	Metric	Target
Pipeline hygiene	Open deals with a scheduled next step	100%
Trust	Drafts confirmed with no or minor edits	Above 80%
Responsiveness	Due follow-ups acted on within 2 days	80%
Efficiency	Time spent on CRM updates per seller	Down 70%
Revenue	Cross-sell pipeline from existing clients	+20% in 2 quarters

TRUST EARNED IN FIVE GATED STAGES

OCT 2026 · DONE

PROTOTYPE

Built and tested.
Nothing touches the
real CRM.

DEC 2026

SHADOW ALPHA

2 users; drafts
compared with what
they record. Nothing
saved.

Gate: fields 90%+
right, zero personal
data

JAN 2027

CLOSED BETA

All 4 sellers confirm
real drafts; reminders
on.

Gate: 80% drafts
accepted with minor
edits

FEB 2027

PHASED

Dashboard used in
the weekly pipeline
review.

Gate: 90% of leads
recorded in 24 hours

MAR 2027

FULL RELEASE

Standard way of
working; LinkedIn
and cross-sell next.

Gate: 60 days stable
on all metrics

FOUR DECISIONS TO START THE DECEMBER ALPHA

1 · CONSENT

Founders agree, in writing, to read-only access to work email and calendar, with exclusion rules.

2 · SYSTEMS

Confirm our email, calendar and CRM providers, and check the CRM's own AI before we build.

3 · AI BUDGET

Approve a paid AI tier: about 600,000 tokens a day, around \$5 a month at full volume.

4 · OWNER RULE

Agree who owns deals with no owner, so every reminder reaches someone.

NEXT STEPS

WITH YOUR GO-AHEAD, SHADOW MODE STARTS IN DECEMBER

OCTOBER

Confirm integrations; label 300 past emails and meetings as the test set

NOVEMBER

Build live email and calendar connectors; run the launch-blocker evals

DECEMBER

Shadow mode with 2 founders; measure the baseline time on CRM updates
